

Environmental policy Oresund Heavy Industries

Oresund Heavy Industries AB with subsidiaries has one of Scandinavia's largest dry dock, a floating dock with great capacity, an extensive quay capacity admits and large production facilities. The Company is strategically located in the middle of the Öresund region and we strive to be the primary choice for our customers and a full partner in the repair, maintenance and refurbishments of ships as well as new production of large steel structures.

An important part of decision making and action in the Oresund Heavy Industries is the consideration of the environment. Through our operational system, we work to continually improve and prevent pollution and environmental damage.

This is done by:

- Comply with legal requirements and other relevant requirements as we are affected by.
- Strive to minimize pollution to air and water including painting, welding, plasma burning and oil handling.
- Strive to minimize the environmental impact of energy use and transport.
- Ensure a good management of chemicals.
- Improve waste management with recycling in mind.
- Promote environmental awareness among our employees by getting every employee to take their responsibility towards the environment and contribute to improving work practices and procedures.
- Influencing our customers, suppliers and contractors, to actively work to reduce our collective impact on the environment.

We strive for transparency in our work for a good quality and sustainable environment.

Jonas Hansson

CEO
